Product Description

Oregon Power Equipment 30 Ton Log Splitter

The 3000 Series log splitter is a step up in power and performance over the 2500 Series. Delivering up to 30 tons of performance with a 12.9 cycle time. Powered by a professional grade Kohler SH265 engine.

PRODUCT DETAILS

- Oregon 30 Ton Log Splitter with Kohler SH265 196cc Engine
 - High-strength Heavy-duty H-beam Design - Robotically welded beam with welded stripper plates and log cradles engineered to handle the high tonnage rates time and time again for years of trouble-free operation.
 - Horizontal & Vertical Operation - Oregon allows flexibility for splitting logs horizontally for an assembly line approach or vertically for the thick and heavy logs.
 - Log Catcher Included - All Oregon log splitters include a log catcher for easy horizontal splitting.
 - Optimized Wedge - All Oregon log splitters include an optimized welded wedge with optimal knife edge and separator for efficient splitting.
-
