Product Description

Toro 5000 Series Rear Discharge 60" - 72924

Z Master Professional 5000 Series mowers offer rear discharge decks for increased productivity in taller grass. These EFI models also use up to 25% less fuel than equivalent non-EFI mowers. The rear discharge design allows operators to trim on either side of the deck — no need to change direction to avoid discharging debris on roadways, sidewalks or flowerbeds. Clippings are dropped within the path of the mower, saving time and cleanup.

- Our TURBO FORCE deck features heat-treated steel blades and our patented adjustable discharge chute, nothing cuts as fast or as well
 - Unitized pump and wheel motor uses proven commercial hydraulic components while eliminating hoses and other potential leak points
 - Deluxe suspension seat features thick cushions, large bolsters, fully adjustable to match operator comfort
 - Tweel Turf Tires - No air pressure to maintain, no flat tires, no compromises. Extra long wear life two to three times that of a pneumatic tire at equal tread depth.
 - Horizon360® Business Management Software. Work More Efficiently. Run More Profitably.
-
