Product Description

STIHL RCA 20 Battery Powered Pressure Washer

The RCA 20 is a battery-powered cleaner ideal for light jobs from cleaning tires to watering plants. The 4-in-1 nozzle easily switches between flat, point, rotary, and shower settings for a variety of applications, and ECO mode helps users get the most out of their battery charge while reducing pressure for delicate applications. Included with the cleaner is a siphon hose, one-gallon water bag, detergent sprayer, and spray lance, giving the RCA 20 the ability to draw water from multiple sources. The lightweight and compact design and the handy storage bag make this washer easy to take with you to the backyard or on the road.

The RCA 20 Set comes with all the standard attachments as well as the AS 2 lithium-ion battery and a STIHL AL 1 standard charger.
